twarthman104@gmail.com | 440-787-5778 | Columbus, OH | github.com/Trevor-Warthman | linkedin.com/in/trevor-warthman

Full-stack engineer with 5+ years of experience owning SaaS systems end-to-end, including architecture, cloud infrastructure, security, CI/CD, and application code, and observability. Known for project ownership, leading code review, and tracing issues across distributed and asynchronous systems, while collaborating with external teams and clients. Advanced user of agentic AI tools like Claude Code to accelerate development and automate daily workflows. Seeking roles where I can lead in architecture, developer growth, and continuous improvement of team processes.

EXPERIENCE

Mitratesh Assurehire, Remote — Senior AI Full Stack Engineer

March 2026 - PRESENT

- Onboarded as a member of the senior leadership team, responsible for all AI initiatives and research, AWS Infrastructure, and CI/CD development, with a focus on accelerated output via AI tools
- Leads many concurrent epics, including implementing lower test environments, integration with the BI software team, observability integration via New epic, and Assurehire AI spiking and scoping
- Quickly took a leadership position as primary SOC2/security expert, Github/Jira admin, and SWDLC process improvement driver

Ellucian RaiseMe, Remote — Senior Software Engineer

July 2025 - March 2026

- Additional responsibilities as the subject matter expert in AWS infrastructure with Terraform, CICD, vulnerability monitoring, support, Synthetic and E2E tests, and our Go microservices
- Additionally responsible for mentoring, story grooming, planning and implementing epics at a rapid pace

Ellucian RaiseMe, Remote — Software Engineer II

Aug 2022 - July 2025

- Worked with a tight knit group on raise.me, an amazing site built to help students find scholarships and track their path to college.
- Owned projects across a Rails/React-TS monolith and 15+ microservices in Go, Python, and Node with AWS infrastructure.
- Required frequent context switching, independence, and the ability to review code, design architecture, and iterate on tasks efficiently.

Languages and Frameworks

React
Typescript
Ruby on Rails
Go
Css, Sass
Vue.js
.NET Core C#
Node.js
Python
ColdFusion
Java

Databases

SQL (Postgres, Microsoft SQL)
NoSQL (MongoDB, DynamoDB)
ORMs
(ActiveRecord, LINQ, Mongoid,

MoreSteam, Columbus — Software Engineer

Apr 2021 - Aug 2022

- Designed, implemented, and deployed software solutions to 7+ SaaS products in Vue.js, C#, ColdFusion, vanilla HTML/CSS/JS, and more, both as a supporting and lead project engineer.
- Managed a workload and Azure infrastructure across product teams.
- Led the 2021 summer internship program and directly mentored both a summer intern and junior developer.
- Took on additional duties as coordinator for *Lunch & Learn* sessions.

MoreSteam, Columbus — Software Developer

Jan 2021 - April 2021

Arcos LLC, Columbus — QA / IT Intern

June 2019 - Oct 2019

EDUCATION

The Ohio State University — B.S. Computer and Information Science

Aug 2016 - Dec 2020

- **Specialization:** Artificial Intelligence
- **Minor:** Chinese Language and Culture

PROJECTS

Observability - Assurehire

Integrated New Relic into the assurehire application, replacing older systems (datadog and sentry raven) to centralize monitoring and logging of infrastructure, requests, and logs

CI/CD Modernization - Assurehire

Tasked with planning and implementing lower environments, testing, and a build and deployment strategy for assurehire, including:

- CI: Pipelines, E2E and unit testing, testing automation
- CD: an iterative deployment modernization strategy beginning with new envs, moving towards containerization and production deployments
- Infrastructure management via AWS and Terraform

My responsibilities involved planning, communicating requirements,

Mongoose)

ETL concepts

Technologies and Tools

Agentic AI (Claude Code, Codex, Copilot, etc)

Cloud Platforms (AWS, Azure)

Containerization (Docker)

Atlassian (Jira, Confluence)

Version Control (Git, Github, Bitbucket, Azure Repos)

CI/CD (Github Actions, CircleCI, Jenkins, AWS Code Pipeline, Azure Pipelines)

IaC (Terraform, CloudFormation)
E2E Testing (Puppeteer, Playwright)

Documentation (Swagger)

Postman

CLI Tools (bash)

Security

implementing, and teaching the team while discussing requirements with the CTO.

Consolidated Microservices into Golang Lambdas - *RaiseMe*

Iterated in modular chunks while converting four microservices from various languages into Golang AWS Lambdas. Worked to make infrastructure more reliable, easy to iterate on, and testable, while also mitigating risk. Also added two new services soon after utilizing the new standardized CI/CD pipeline and docker setup.

Rolled out RaiseMe in iOS/Android with Ionic - *RaiseMe*

Continued years of work by former developers to incorporate existing React architecture with Ionic, allowing web/iOS/Android to be deployed separately but contained in the same codebase and run with the same pipelines across environments.

Critical Library Upgrades - *RaiseMe*

Webpack, Rails, Puma, ESLint, Bootstrap, React. You name it, I've helped upgrade it.

Design and Implement New Core Internal API - *MoreSteam*

Collected requirements, designed routes and resource collections for, and implemented the initial 20+ endpoints for a modern C# REST API to be used by products of varying stacks, phasing out the company's 20-year-old core monolith.

Core Database Admin - *MoreSteam*

Implemented the frontend architecture for a company admin tool to view and edit core data, including users, client organizations, and course offerings in a Vue.js app from the ground up. Worked efficiently using external component libraries to get a standardized theme.

Architecture Modernization - *MoreSteam*

As a leader of improving the development process, worked to integrate npm, ESLint, backend linting, E2E testing, and both frontend and backend unit and integration tests for all services. Also involved in the standardization of CI/CD practices and cloud architecture practices across macro-services.
